

# THE MATHS TALKS

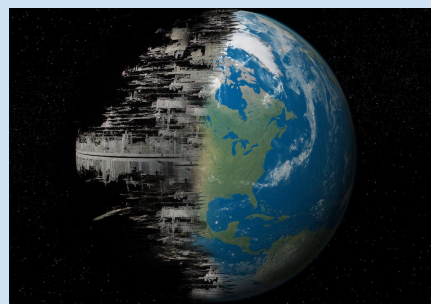

---

Spring 2018

**Thursday March 29**

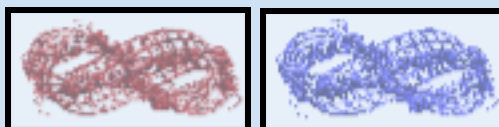

## **Why the mice built the earth with these dimensions?**

We will explore a simple physics problem - dig a hole through the earth and drop a ball. How long does it take for the ball to get to the bottom of the hole? Time permitting we will also discuss the answer to life, the universe and everything. Prerequisites for this course are some Calculus I and an interest in mathematics.

**Professor Frank Sanacory** SUNY College at Old Westbury

**Common Hour - NAB 2034 - Refreshments served**

Event sponsored by Student Affairs.
